

Sales Proposal & Pricing Sheet

InfusioTech Restaurant Ordering SaaS | Version 1.0 | 2 October 2026

Purpose

Client-facing proposal framework for presenting the restaurant ordering SaaS.

Proposal Summary

- InfusioTech provides a restaurant-branded QR ordering and operations platform that helps restaurants receive direct orders and manage them from one mobile app. Customers order through a browser without installing an app.

Indicative Plans

- Starter — ■2,999/year: QR menu, direct ordering, customer web flow, basic order dashboard and reports.
- Growth — ■5,999/year: Starter plus restaurant mobile app, live updates, table management, CRM and sales/item analytics.
- Premium — ■9,999/year: Growth plus advanced analytics, granular staff roles, multi-branch options and priority support.
- Final features, limits and promotional terms must be confirmed in the signed order form.

Potential Additional Charges

- One-time onboarding or menu digitization; QR/NFC printing and shipping; payment gateway fees; SMS/WhatsApp/calling usage; custom integrations; extra branches or bespoke work.
- Quote taxes and any recurring third-party charges transparently. Do not promise unlimited usage unless limits and cost coverage are approved.

Value & Deliverables

- Restaurant tenant setup; agreed menu/table configuration; QR assets per order form; owner account; staff access setup; onboarding walkthrough; support channel and plan entitlements.

Commercial Terms Template

- Customer legal name and outlet; selected plan; start/end date; fees and taxes; payment schedule; included limits; renewal/cancellation/refund rules; data export/retention; support hours; signatures and authorized contacts.

Sales Discovery Questions

- Number of outlets/tables; order volume; current POS/workflow; online payment preference; menu readiness; staff count; language needs; connectivity; integrations; onboarding timeline.
