

Restaurant Onboarding Form & Guide

InfusioTech Restaurant Ordering SaaS | Version 1.0 | 2 October 2026

Purpose

Collects setup information and guides a restaurant from signup to first live QR order.

Restaurant Information

- Legal/business name; display name; outlet address; map/location details if needed; owner name; business email/phone; timezone; preferred language; logo and brand colors.

Operating Setup

- Opening days/hours; order acceptance schedule; dine-in/table ordering options; tax configuration reviewed by restaurant; enabled payment methods; cash handling/reconciliation contact; cancellation rules.

Menu Preparation

- Category and item names; descriptions; current prices; variants; add-ons; availability; dietary/allergen notes supplied and verified by restaurant; images; tax classification where applicable.
- Restaurant approves the digitized menu and displayed prices before launch.

Tables & QR/NFC

- Table labels/numbers; seating capacity if relevant; QR count; NFC tag requirement; placement/printing preference; test scan at each table; record asset-to-table mapping.

Staff Setup

- Owner account; staff names and invitation contacts; roles; permission review; manager contact; staff activation test; revoke temporary/test accounts.

Go-Live Checklist

- Verify restaurant profile, menu, tax/payment setup, hours, tables and QR links.
- Place a test order from a customer phone; verify restaurant app alert, order details, status progression and payment/cash state.
- Train owner and staff; confirm support contact; obtain approval to activate live ordering.

Sign-Off

- Restaurant representative confirms menu/prices, tax/payment settings, table mapping, staff access and go-live readiness. Record approver, date and version.
